Education

VNR Vignana Jyothi Institute of Engineering and Technology	2024 – 2028
B.Tech in Computer Science and Engineering	CGPA: 9.41/10.0
Narayana Junior College	2024
Intermediate - Telangana State Board	97.3%

Technical Skills

Languages	Python, C, C++, Java, JavaScript, SQL
CS Fundamentals	Data Structures & Algorithms, OOP, DBMS, Operating Systems
Machine Learning	Scikit-learn, PyTorch, TensorFlow, Pandas, NumPy, Matplotlib
Web Development	React.js, Node.js, REST APIs, FastAPI, Next.js
Databases	MongoDB, PostgreSQL, Supabase
Tools	Git, GitHub, Docker, Power BI, n8n

Experience

Software Development Intern – Police Hospital Digital Healthcare System Jan 2026 – May 2026
Client: PupilSolutions Pvt Ltd, Hyderabad

- Contributed to the development and debugging of a digital healthcare platform for a **Government Police hospital in Telangana**, supporting patient registration, diagnostics, inventory, and hospital workflows.
- Improved role-based access control and backend functionality supporting multiple departments and user roles.

Projects

TrustLens – AI-Powered Phishing Detection Browser Extension

Tech Stack: JavaScript, Python, Chrome Extension APIs

- Built a Chrome extension for phishing detection across **Gmail, WhatsApp Web, Telegram Web, and browser websites**, supporting both URL and email analysis.
- Engineered a two-stage phishing detection pipeline using an in-house ML classifier for primary threat detection and an AI explanation layer for flagged URLs and emails, reducing inference overhead while maintaining response time under 2 seconds.

FinGuide – Explainable AI-Based Financial Advisory Platform

Tech Stack: Python, Random Forest, SHAP, FastAPI, Next.js, MongoDB, n8n

- Developed an explainable financial advisory platform for loan prediction, EMI estimation, and personalized credit card recommendations.
- Trained a Random Forest model on **20,000+ loan records**, achieving **88.1% accuracy** and a **0.887 ROC-AUC**; integrated SHAP to provide feature-level explanations for every prediction.
- Built a full-stack application using FastAPI, Next.js, MongoDB, and n8n with scalable REST APIs, workflow automation, and real-time financial recommendations.

SkillSync AI – Workforce Skill Gap Forecasting Platform

Tech Stack: React.js, TypeScript, Supabase, Tailwind CSS, GenAI APIs

- Developed an AI-powered workforce intelligence platform for skill-gap analysis, role-fit prediction, and personalized learning recommendations.
- Engineered a data pipeline processing **100+ employee profiles** and **821+ skill records**, mapping **48+ core skills** across **15+ job roles** to generate AI-driven insights.
- Integrated GenAI APIs to provide context-aware recommendations and built a scalable full-stack application using React.js, Supabase, and Tailwind CSS.

Achievements

- Microsoft Certified: Data Analyst Associate (Power BI)
- Supervised Machine Learning (Coursera) – **Andrew Ng**
- Krithoathon(National Level Hackathon) – **1st Place** among 400+ teams
- Innovathon(National Level Hackathon) – **2nd Place** among 250+ teams
- Webathon 4.0 – **1st Place** among 200+ teams
- Emerge Project Expo – **1st Place**

Leadership

Google Student Ambassador

May 2026 – Present

- Selected as a Google Student Ambassador representing VNRVJIET; organized technical workshops and community outreach initiatives.
